

## Neatsfoot Oil

**Key Ingredient:** Neatsfoot Oil

**Directions for use:** Shake well before use. Apply sparingly to the underside of leather using a brush or soft cloth. Leave to soak into leather. Re-apply if necessary.

Take care not to over apply.  
Remove any excess oil left on the leather's surface.

NAF recommend a small patch test in an unseen area prior to initial use.

**Caution:** Do not use on unsealed aniline or untreated leather, nubuck or suede.

Replace lid after use. Store in a cool, dry place. Keep out of reach of children. Oily rags can spontaneously ignite. NAF recommend that you pour water over them after use.
